

Publishing Tools Installation:

- 1) Close all applications.
- 2) Go to www.aspenrepro.com
- 3) Download the following two programs:
 - a. GS733W32.exe (Ghostscript)
 - b. PubTools1_6.zip
- 4) Install the Ghostscript program by double clicking on the GS733W32.exe file.
 - * accept the default locations, if your drive is full you can change the path where the program will be installed.
- 5) Unzip the PubTools1_6.zip file to a temporary directory. Once unzipped you will want to run the setup program.

Note: The publishing tools will look for Autocad and install a publishing utility and will show up as a new button within the toolbar at the top within the AutoCAD program.

- 6) Go to the start, programs, Océ Client Tools, Océ Publisher and open the application. Select Tools and then options. Under File Processing and PostScript/PDF look to make sure that Ghost Script is selected and that the path is correct for the program. (see screen shot below.)

If needed you can browse to the program directory by clicking on the square box with the three dots to bring up a browser window so you can browse back to the Ghost Script application. (Normally C:\GS\GS7.33\BIN\GSWIN32C.EXE)

7) Click OK to close the configuration window.

The program is now ready for operation.
